Work Experience

Data Engineering Intern | Mediaamp | [June 2025 – Current]

- Developed robust **Scrapy** & **Playwright** scrapers for 10+ e-commerce sites, handling JS rendering, CAPTCHAs, bot detection, and proxy/user-agent rotation.
- Built scrapers to work reliably on server infrastructure with **Redis** queues, **Celery** workers, Cron jobs, and **NGINX load balancing** across 7 servers, processing lakhs of URLs daily.
- Focused on scraper accuracy and stability, iteratively improving performance via error logs and monitoring.
- Collaborated in a team to deliver large-scale automated data collection for product and competitor insights.

Projects

[Real Time Chat App](#)

- Built a full-stack chat app with **Node.js**, **Express**, **MongoDB**, **JWT auth**, **Socket.io** messaging, and real-time online/offline tracking.
- Optimized performance using **Redis caching**, reducing message fetch time .
- Developed responsive, theme-switchable UI with TailwindCSS, DaisyUI, and managed global state via **Zustand** with robust data validation.

[Game Listing Website](#)

- React app to discover games via **RAWG API** with search, filters, game details, pagination, and per-user bookmarks (**Clerk auth**).
- Built with **Redux Toolkit**, React Router, Bootstrap, Vite, featuring skeleton screen and custom error pages.
